# GEORGIE MCHARDIE DIGITAL PORTFOLIO SPECIFICATIONS

\_\_\_

#### By Georgia McHardie

### Introduction

The design strategy for a personal portfolio site is outlined in this document. It also offers site maps that highlight the connection of the site's pages and files. Design criteria are addressed, as are testing techniques. A text plan is included to outline the CSS3 & HTML code for the most integral components.

# **Table of Contents**

### Design & Development Requirements

The electronic portfolio website's stated aim is to promote and display my professional talents, expertise, and work to potential employers, companies, and other interested parties. The site link can be displayed on a resume or cover letter. Having a portfolio site is increasingly becoming a requirement of web developers and designers.

The following requirements have been recognised as critical to the effective design and development of a website for the intended purpose.

- → Home Page index.html
  - ◆ Name & Short description
- → About Me Page about.html
  - ◆ Blurb about professional experience, values and goals
  - ◆ Character reference
- → Resume Page resume.html
  - ◆ Education experience
  - ♦ Work experience
  - ◆ Link to resume download
  - ♦ Hobbies
  - University subjects
- → Web Skills Page webskills.html
  - ◆ Descriptions of experience with skills
  - ◆ Percentage representations of skill capabilities
- → Projects Page
  - ◆ Photos of completed projects
  - Descriptions of skills used in each project

- ◆ Links to github repositories for each project
- → Contact Page contact.html
  - ◆ Contact form
  - ◆ Contact details

The website should be straightforward to use, with clear navigation and an intuitive user interface. Design should be consistent across all pages.

All information must be logically presented and grouped for the user. The creation of a user-friendly experience employing images, text, design, and other appropriate tools will aid in the effective transmission of the material.

<u>Canva</u>, <u>Miro</u>, and <u>Balsamiq</u> will be used to design the website. Development will be completed using VSCode and coded in HTML5 and CSS3. Icons will be rendered using <u>Font Awesome</u>. After development, the site will be hosted on the csusap.csu.edu.au server and <u>Github</u> and maintained and updated by the developer.

# **CSS Layout**

#### **Overview**

The website's layout will be developed with CSS3. An external style sheet will be used to style all pages on the site, this file will be located in a CSS folder and named as style.css. An external styles sheet will also be used for print styles and will be located in the CSS folder, named print.css. Any modifications to the external style sheet will, if appropriate, be applied to the entire site, making maintenance and upgrading by the developer simple.

Full descriptions of layout choices begin on the next page

### Home page layout

1	Header with nav & logo	Width 100%
2	Image with animated border	Flex box to align with title, space between
3	Title with descriptive words	Flex box to align with image, space between
4	Footer with contact links	Flex box to align on one line, items aligned centre

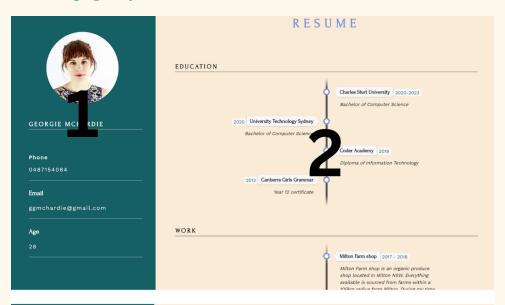

## About page layout

"Georgie and I have been acquaintances for long time. She is one of the most commit industrious, and creating she is very long. She is very sympathetic and corporation of the state of the	ted, er y y sses he n a
0487154084 ggmchardie@gmail.com	<b>♦</b> Carwoola

1	Title with animated border	Flex box, justify center
2	Photo	Flex box, space between
3	Blurb	Flex box, space between
4	with animated border	Flex box, justify center

### Resume page layout

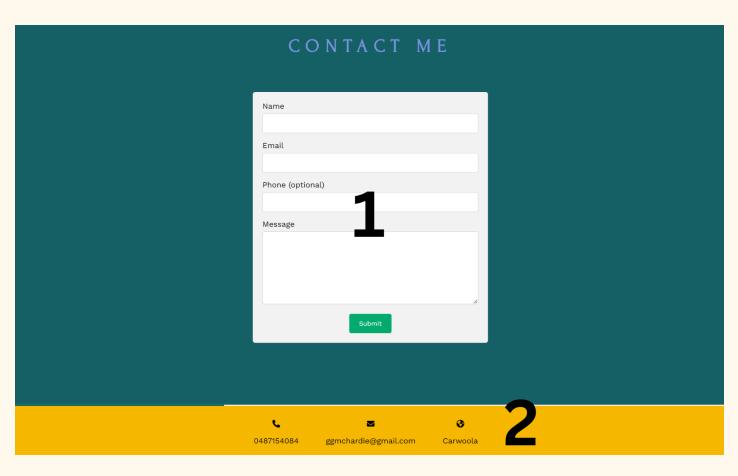

1	Aside section with photo	Float left
2	Main section timeline	Float right
3	Main section table	Float right
4	Main section Hobbies	Float right, display block

#### Web Skills page layout

1	Aside section with photo	Float left
2	Main section graph	Float right

# Contact page layout

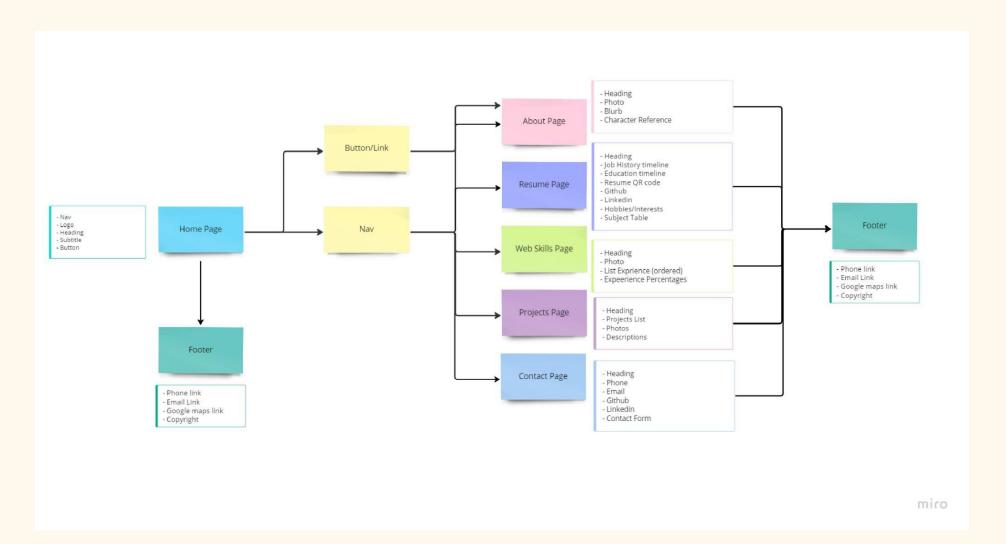

1	Contact form	Flex box, center
2	Footer	Flex box, center

# CSS Text Plan

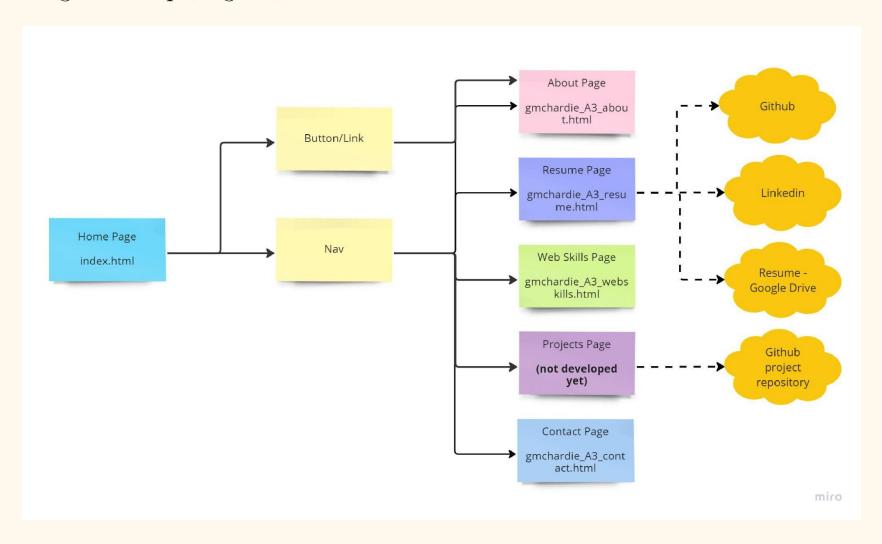

css/styles.css	Font	Colour /Special Characteristics	Align
body	font-style: normal; font-weight: 300;	background-color: #156064; position: relative; margin: 0; padding: 0;	
body p	font-family: 'Work Sans', sans-serif; font-size: 14px;	color: #606f76;	text-align: justify;
nav		background-color: #E7C8C2 overflow: hidden;	
nav ul		list-style-type: none; margin: 0; padding: 0;	
nav li a:hover		background-color: white;	
.nav-link	font-weight: bold; font-size: 18px; text-decoration: none; font-family: 'Forum'; letter-spacing: 4px;	color: #313131; display: block;	text-align: center;

nav a:hover		border-bottom-color: #313131;	
h1	font-family: 'Forum'; font-size: 38px; letter-spacing: 13px;	color: #7793e2; text-transform: uppercase;	text-align: center;
h2	font-family: 'Forum'; font-size: 16px; letter-spacing: 8px; text-transform: uppercase;	color: #7793e2;	text-align: center;
h3	font-family: 'Work Sans', sans-serif;		
h5	font-family: 'Forum'; font-size: 16px; letter-spacing: 2px;	color: white;	vertical-align: top;
footer	font-family: 'Work Sans', sans-serif;	background-color: #F5B700;	text-align: center; display: inline-flex;
.copyright	font-family: 'Work Sans', sans-serif;	margin-top: -2%; padding-bottom: 1%;	text-align: center;

# **Storyboards**

File: index.html Screen ID: 1.0 Date: 7/05/23

#### **Elements:**

#### Graphics:

Image with border animation & animated button, animated logo

#### Text:

Name & short descriptive words

Audio/Video: None

#### Notes:

Flex and negative margins used to position elements

Description	Home Page
Content	Image, title, brief description
Interactions	Nav links to all pages, email and phone links in footer
Media Creation	Image created using Canva, Logo created using Canva
Navigation	Nav to all pages

File: about.html | Screen ID: 2.0 | Date: 7/05/23

#### **Elements:**

### Graphics:

Image, title with border animation & animated border on reference

#### Text:

Title, blurb about self & character reference

Audio/Video:

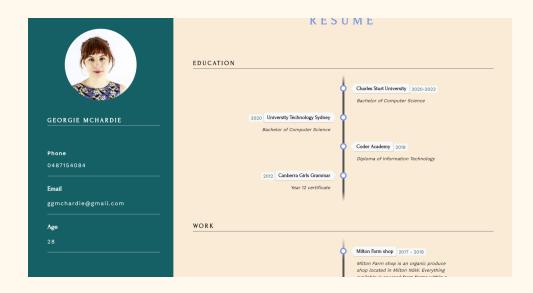

None

#### Notes:

Flex used to position elements

Description	About Page
Content	About photo, blurb, character reference
Interactions	Nav links to all pages, email and phone links in footer
Media Creation	Logo created using Canva
Navigation	Nav to all pages

File: resume.html | Screen ID: 3.0 | Date: 7/05/23

#### **Elements:**

#### Graphics:

Image, timelines, icons for hobbies & socials, QR code

#### Text:

Title, personal details, work & education timelines & hobbies

Audio/Video: None

#### Notes:

Aside and main sections used to divide content

Description	Resume Page
Content	Photo, personal details, work and education timelines, list of hobbies and table of uni subjects
Interactions	Nav links to all pages, email and phone links in footer, links to github and linkedin, QR code for resume
Media Creation	Logo created using Canva
Navigation	Nav to all pages

File: webskills.html | Screen ID: 4.0 | Date: 7/05/23

	WEB SKILLS
	Front End Experience HTML5 - 100%

Whilst completing my degree, a team and myself developed an android application using myself developed an android application using myself developed to the control of the	

#### **Elements:**

Graphics:

Image, bar graph with percentages for capabilities

Text:

Title & skill descriptions

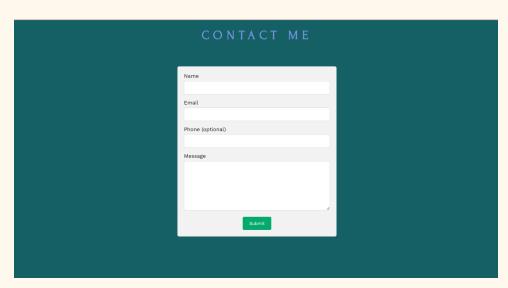

Audio/Video: None

Notes:

Aside and main sections used to divide content

Description	Web Skills Page	
Content	Photo, list of skills with descriptions, bar graphs with percentages to show capabilities	
Interactions	Nav links to all pages, email and phone links in footer	
Media Creation Logo created using Canva		
Navigation	Nav to all pages	

File: contact.html | Screen ID: 5.0 | Date: 7/05/23

#### Elements:

Graphics:

Contact form

Text:

Title and form labels

Audio/Video:

None

Notes:

Flex used to center content, FormSpree used to post form inputs to personal email

Description	Contact Page	
Content	Title & contact form	
Interactions	Nav links to all pages, email and phone links in footer, contact form posted to personal email	
Media Creation	Logo created using Canva	
Navigation	Nav to all pages	

# **Testing Procedures**

The design for the portfolio site will be created using the following software:

- → Miro Nav & Structure Maps
- → <u>Canva</u> Storyboards
- → <u>Balsamiq</u> Wireframes

The development (coding) for the site will be done using VSCode

To guarantee the integrity of the website's design and functionality, the subsequent validation and testing procedures will be carried out.

#### **Validation**

HTML 5 & CSS3 code will be validated using the following validator tools

- **→** <u>W3C</u>
- → W3C CSS

### Functionality and Look/Feel

Fui	unctionality will be tested by the developer on various browsers (and versions)				
		Chrome			
		Firefox			
		Internet Explorer			
		Microsoft Edge			
		Safari			
Res	Responsiveness will be tested by the developer on a variety of screen/browser sizes				
		640 x 480 pixels			
		800 x 600 pixels			
		1024 x 768 pixels			
		1280 x 800 pixels			
		1366 x 768 pixels			
		1920 x 1200 pixels			

# **Usability**

Grammar and spelling will be checked as part of proofreading
The website's navigation and all external links will be checked
There will be quality and optimisation checks on all of the pictures
Functionality of email links will be checked
External links will be tested to see if they open in a new window
Javascript and forms will be checked
To guarantee usability for all users and take into account issues like colour blindness and poor vision, testing for visual and perceptual features will be done
A comprehension test will be administered
File and picture sizes will be measured and load times will be checked
Accessibility factors will be examined (e.g., Alt tags on all photos, etc.)
The importance of SEO (search engine optimisation) will be taken into consideration
Check design is consistent across all pages
To guarantee ease of modification and interpretation, the code structure will be examined

# **CSS3 Validation**

WSC css Validator results for style.css (CSS level 3 + SVG)

Congratulations! No Error Found.

This document validates as CSS level 3 + SVG!

To show your readers that you've taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the XHTML you could use to add this icon to your Web page:

(\$\frac{\partial}{\partial} \text{cal} \text{ href="http://jigsaw.w3.org/css-validator/check/referer"> \text{cing style-moder-0.yiidth:08px;height:31px"} \text{ stree-"http://jigsaw.w3.org/css-validator/images/vcss"} \text{ cals style-moder-0.yiidth:08px;height:31px"} \text{ stree-"http://jigsaw.w3.org/css-validator/images/vcss"} \text{ cals style-moder-0.yiidth:08px;height:31px"} \text{ cals

## **HTML5 Validation**

Issues need to be resolved - Added to issues log

Full copy can be seen here

# Issues Log

Issue	Fixed?
Internal styles need to be moved to external sheet - may cause layout issues	Yes
Nav elements shifting too far on hover	Not yet
Pages are not responsive - did not build for mobile first	Not yet
Projects page not created	Not yet
Contact page posting via FormSpree not to http://csusap.csu.edu.au/cgi-bin/echo_form	Not yet
HTML5 validation issues need to be resolved	Not yet
